

12V

24V

300W

IP21

PC  
KOPTERM

# KOP302

## Programmable battery charger

### MAIN FEATURES

- | For Lead-acid, NiZn, NiCd, NiMH and lithium batteries
- | Fully automatic operation
- | Completely programmable
- | Up to five charging phases
- | Simple to use and program
- | Battery monitor and Ah counter
- | High precision
- | Low noise
- | Battery status LED indicators
- | Battery temperature compensation

### TECHNICAL CHARACTERISTICS

Nominal battery voltage	12V	24V
Max. output voltage	16,5V	33V
Nominal output current	20A	10A
Efficiency	87%	88%
Peak input current	1,8A	
Input voltage	230V $\pm$ 15% 50-60Hz	
Dimensions (L x W x H)	222 x 155 x 80mm	
Weight	2,1kg
